

**TORMEK T-8**

**TORMEK T-7 (no longer available)**

**TORMEK T-4**

**Tormek offers two models, the powerful T-8 / T-7 with a 250 mm (10“) grindstone and the compact T-4 with a 200 mm (8“) grindstone.**

The T-8 / T-7 is designed for the toughest work and can run continuously. The T-4 is designed for 30 min operation per hour. With the T-4 you get access to the Tormek high quality sharpening system at a favourable price and it is ideal for sharpening hand tools, like knives and scissors.

We recommend the T-8 / T-7 when sharpening planer blades in the SVH-320 attachment and moulding knives in the SVP-80 attachment. The T-8 / T-7 is also the most suitable for turning tools and other demanding tools, since its bigger motor and grindstone can cope with a higher grinding pressure.

Both models have a powerful industrial motor and stainless steel main shaft, and are in all details built to Tormek's high quality standards. T-8 / T-7 features a 7 year warranty upon registration (also for commercial, industrial or educational purpose). T-4 features a 7 year warranty (when used for commercial, industrial or educational purpose the warranty is 2 years).

**Why Tormek?**

- ✓ **Sharpen all your edge tools**  
With the wide range of Tormek patented jigs, you can sharpen practically all types of edge tools. Tormek is dedicated to developing water cooled sharpening through innovative solutions!
- ✓ **Exact replication**  
The key word when sharpening the Tormek way is repeatability. You can shape the tool exactly to your needs. Even complicated shapes such as fingernail turning gouges, spoon carving gouges and oval skew chisels with a radiused edge are easily sharpened.
- ✓ **Cleanest edges**  
You finish the sharpening process by honing and polishing the edge on the leather honing wheel. You get a razor sharp edge.
- ✓ **Fast sharpening**  
Once the shape is created, you remove only a fraction of the steel when re-sharpening, which makes it a quick job.
- ✓ **Full control**  
At the low speed, you have full control of the sharpening and remove no more steel than necessary. An extra benefit is that your tools last longer.
- ✓ **No risk of overheating**  
There is no risk that the edge becomes overheated and loses its hardness.
- ✓ **Safe and quiet**  
Worn steel particles are deposited into the water trough, keeping the air clear of grinding dust. No sparks are produced that can be a fire hazard in workshops with a lot of wood dust. You will also find that the Tormek runs surprisingly quietly.
- ✓ **Quality and performance**  
Buying a Tormek is a safe investment in quality and performance with a 7 years warranty. T-8 / T-7 features a 7 year warranty upon registration (also for commercial, industrial or educational purpose). T-4 features a 7 year warranty (when used for commercial, industrial or educational purpose the warranty is 2 years). You are assured that all future developments will fit your machine.
